## DETECTED VULNERABILITIES

## ISSUES

**LOW** A floating pragma is set.  
SWC-103 The current pragma Solidity directive is ""^0.8.4"". It is recommended to specify a fixed compiler version to ensure that the bytecode produced does not vary between builds. This is especially important if you rely on bytecode-level verification of the code.

```

**LOW** Requirement violation.  
SWC-123 A requirement was violated in a nested call and the call was reverted as a result. Make sure valid inputs are provided to the nested call (for instance, via passed arguments).
